Note to the file

Subject: Camden Municipal Wells, NJD980769087, and Puchack Wellfield, NJD981084767 as Alias Sites

Date: August 12, 1993

This memorandum is to document that both Camden Municipal Wells and Puchack Wellfield are to be made aliases of the sites listed below. The rationale is that both the Camden and Puchack sites are not sources of contamination, but rather they are targets most likely affected by the sites listed below. These seven sites were listed as potentially responsible parties in the 12/31/89 Site Inspection for Camden Municipal Wells. The Puchack Wellfield is located within the area identified as the Camden Municipal Well site. It is expected that, in addressing the sites listed below, the area-wide groundwater contamination problems represented by the Camden and Puchack sites will be addressed.

The Preliminary Assessments (PA) and Site Inspections (SI) conducted at the Camden and Puchack sites were conducted prior to 1989. Therefore, while these events will become part of the event history at each of the seven sites listed below, they will not be counted as additional accomplishments.

Sites to which Camden Municipal Wells and Puchack Wellfield will become alias:
